

OBJECTIVE

Internship in Software Development – Java Back-end | Cloud Computing.

ABOUT ME

I am a student of Analysis and Systems Development in my fourth semester, focusing on back-end development in Java and Spring. I seek to specialize in cloud computing, applying my knowledge in practical projects. I have a solid foundation in software development and am always looking for new technologies. In recent years, I have been developing my communication and teamwork skills

EDUCATION

Systems Analysis and Development

Uniassevi Evening  
Start: mar/2023  
Expected: jul/2026

Web Developer - Back-end - Java

Entra21  
Start: jan/2024  
End: mai/2024

LEONARDO SARDAGNA

SKILLS

- **Javascript** - Basic
- **HTML** - Intermediate
- **CSS** - Intermediate
- **React** - Intermediate
- **Java** - Intermediate
- **MySQL** - Basic
- **Git e GitHub** - Intermediate
- **PowerBI** - Basic
- **Excel** - Intermediate
- **TypeScript** - Basic
- **Spring Boot** - Basic

EXPERIENCES

Military service

Brazilian Army  
mar/2022 - fev/2023

During this journey, I deeply committed myself to mental development, abandoning the old mindset that viewed challenges as obstacles and instead seeing them as opportunities for growth and overcoming.

University

Systems Analysis and Development  
4º Semester

I actively participated in three extension projects, expanding my learning beyond the classroom. Constantly seeking to improve my skills, I also aim to complement my knowledge through courses on the Alura platform.

BootCamp Cloud

T-Systems  
In progress

During the course, I am deepening my knowledge in Windows, Windows Server, Linux, Docker, Database Administration, and AWS/Azure. I have already completed activities such as installation, configuration, and management of operating systems and servers, as well as the creation and management of virtual machines. Additionally, the work presentations are focused on the corporate environment, which is enhancing my communication skills.
