LEONARDO SARDAGNA

OBJECTIVE

Develop myself as an IT infrastructure specialist, with a focus on administration and SAP Basis, aiming to act as a SAP Basis Analyst

ABOUT ME

I am a Systems Analysis and Development student, with a focus on IT infrastructure. I am currently an IT Infrastructure intern at T-Systems Brazil, where I am developing my skills with environments such as Windows Server, Linux, Databases and Cloud Computing. I have a solid foundation in technology and am constantly improving my skills to offer safe and efficient solutions. In recent years, I have also been improving my communication and teamwork skills, which are essential for collaborative environments.

- **HTML** - Intermediate
- **CSS** - Intermediate
- **React** - Intermediate
- **TypeScript** - Basics
- **Git e GitHub** - Intermediate
- **PowerBI** - Basics
- **Excel** - Intermediate

EXPERIENCE

IT Infrastructure Intern

T-Systems Brasil
Fev/2025 - present

I work in support and maintenance of IT environments, focusing on Windows Server, Linux, Docker, Databases and Cloud Computing (AWS and Azure). I have contributed to the development and implementation of efficient and secure solutions in IT infrastructure, in addition to working with system monitoring using and supporting SAP systems. I work collaboratively with teams to improve systems.

Military service
Brazilian Army
Mar/2022-Fev/2023

I served as a soldier in the Brazilian Army, where I participated in several military activities that required teamwork and great adaptability to different scenarios. During this journey, I committed myself deeply to mental development, transforming the way I viewed challenges, seeing them as opportunities for growth and overcoming.

Faculty
Systems Analysis and Development
5° Semester

I actively participated in four extension projects, expanding my learning beyond the classroom. Constantly seeking to improve my skills, I also seek to complement my knowledge through courses on the Alura platform.
